

MABEMA NUREC

OVERVIEW

The Mabema NUREC 2.0 is a portable platform for digitizing and saving analogue video. The Nurec saves up to 4 video streams to harddrive or USB-stick in real time, with the compression rate of choice. It's possible to overlay date and time or any text. The files are stored in folders and can be moved and copied within the Explorer of Windows. The Nurec replaces the need for VCR:s, printers, video switchers, analogue monitors etc.
